

100 HGB2263BR Bronze Hanger Bearings Getting Ready for Shipment

CEMA Stock Components Save GAF During Unexpected Holiday Breakdown

Introduction

Ranco Fertiliservice, based in Sioux Rapids, IA, designs and manufactures equipment for handling, storing, metering, blending, conveying, and bagging dry agricultural fertilizers. The company has supplied fertilizer-handling systems since 1961.

Screw conveyors are commonly used for conveying dry fertilizer ingredients such as urea, potash, and sulfur. Bronze hanger bearings are commonly used and are very corrosion and abrasion resistant.

Challenge

Ranco Fertiliservice needed 100 stock HGB2263BR bronze hanger bearings to support spare parts inventory for their customers. Having spare bronze bearings on hand helps reduce risk when planned maintenance or unexpected repairs are required.

KWS Advantage

KWS has a huge inventory of CEMA standard stock screw conveyor components. Bronze hanger bearings are kept in stock in every size and configuration. The requested 100 HGB2263BR bearings were shipped the same day as the order was received. By maintaining a large inventory of CEMA stock screw conveyor components, KWS helps customers keep critical equipment operating.

Customer Testimonial

"Thanks to KWS for keeping us in stock with bronze hanger bearings. We will be ordering more very soon".
