

Industries Served

Question

What industries use screw conveyors?

Answer

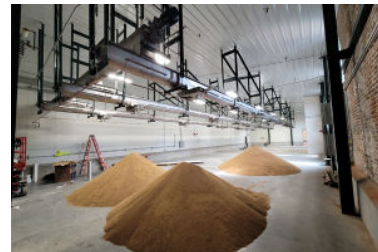

Screw Feeders and Screw Conveyors are used throughout thousands of manufacturing processes for conveying and elevating of bulk materials across a wide range of industrial applications. The industries served include, but are not limited to:

- Agriculture – corn, rice, soybeans, wheat, and other grains
- Alternative Fuels & Power – biomass, shredded plastics, wood chips, corn stover, ash
- Chemical – adipic acid, caustic soda, iron oxide, polyethylene
- Environmental – dewatered biosolids, grit, screenings
- Food Products & Rendering – beef, pork, & poultry processing, pet food, sugar refining, wet corn milling, coffee processing
- Lumber & Wood – saw dust, wood chips and wood shavings
- Metals & Mining – coal, limestone, sand, kaolin clay, potash, and soda ash
- Oil & Gas – frac sand, proppants, drill cuttings, mud additives and chemicals
- Pulp & Paper – wood chips & pulp, cellulose fibers, or recycled newsprint & paper
- Recycling – glass, plastic bottles, aluminum
- Refuse Systems – municipal solid waste
- Stone, Glass, & Concrete – Glass, cement, concrete, brick, tile, wallboard, hydrated lime, diatomaceous earth
